

Some Edge Tool Manufacturers of Sheffield 1787 to 1911

The purpose of this list is to aid identification of the maker's stamps found on billhooks and other edge tools, and to give a guide to their age.

The list has been compiled courtesy of the SHEFFIELD INDEX – Trade Directories:

<http://www.sheffieldindexers.com/DirectoriesIndex.html>

The compilers of the Sheffield Index used the following trade directories:

1787	Gales & Martin Directory of Sheffield
1791	Universal British Directory
1825	Gell's Directory of Sheffield
1828	Pigot's Commercial Directory (1828 -18290
1833	White's History & Directory of Sheffield
1837	White's Directory of Sheffield & Rotherham
1841	Henry & Thos. Rodgers Sheffield & Rotherham Directory
1846	Slater's Directory of Sheffield
1852	White's Gazetteer & General Directory of Sheffield
1862	Drake's Directory of Rotherham & District
1871	White's Directory of Sheffield & District
1905	White's Directory of Sheffield & Rotherham
1911	White's Directory of Sheffield & Rotherham

There may be some errors of transcription, both in the original and the subsequent copying to this list..... Wherever they are obvious they have been corrected.....

Note: an 'Occupation' search for edge in the Sheffield Index found 0 results. This list is the results of a search for edge (see below) - it found 281 entries and for *edge* , which found 542 entries. To it is added a list for *sickle* (62 entries).*

The lists include merchants, makers, manufacturers, forgers and grinders etc. Not all would have made billhooks, and the list is by no means complete blade pruning hooks, tea knives etc.

Allsebrook, James (Edge Tool Manufacturer).

Residing at 38 Trafalgar Street, in 1871.

Recorded in: Whites Sheffield & District Directory - 1871.

Ash, William & Co ((late Roberts and Ash) manufacturers of all kinds of edge tools, brace and bits, skates, saws, plantation tools &c.).

Further searches showed 525 entries for *grinder, 587 entries for *grinder*, 337 entries for cutler, 628 entries for *cutler and 1632 entries for *cutler*.

The 'Occupation' search uses exact word match, but the insertion of a wildcard (*) finds other entries.

Notes:

Ledger Blade: a stationary shearing blade in a machine for shearing the nap of cloth.

Spiral Blade: a rotating shearing blade in a machine for shearing the nap of cloth, c.f. a lawnmower blade. Edwin Beard Budding who invented the lawnmower c 1830 got the idea after seeing a woollen cloth shearing machine in one of the local mills near Stroud in Gloucestershire (UK).
